

TECHNICAL DATA SHEET

ELECTRO-CHEM FLUID

Stainless Cleaning Fluid for Electronic Cleaning-Machines

Code 1920

DESCRIPTION

Callington Electro-Chem Cleaning Fluid is a liquid chemical designed to be used in conjunction with popular electrochemical cleaning devices for the removal of post weld contamination on stainless steel surfaces via an electrolytic action.

Callington Electro-Chem is suitable for use on the following welding methods:

- Spot Welding
- TIG Welding
- Plasma Welding
- Laser Resistance Welding
- Orbital Welding

FEATURES & BENEFITS

- Will work with many brands of TIG/ brush cleaners
- Non-flammable making it workshop safe
- Fast acting, cleans and passivates
- Suitable for stainless steel and similar metals
- Easily rinsed off, reduces cleaning times

DIRECTIONS FOR USE

After completion of the cleaning process any excess fluid can be easily removed by washing/wiping down with clean potable water. The operation should be carried out in a well-ventilated area and the operator must follow all operating and safety instructions set down by the machine manufacturer.

The fluid is acidic by nature and PPE should be worn when handling please refer to the MSDS for further safety instructions.

PHYSICAL PROPERTIES

Density: 1.33g/ml

Appearance: Water White liquid

Transparency: Clear
