

ALUMINIUM PREPARATION & TREATMENT PRODUCTS

The complete package for aluminium processing

ALUMINIUM PREPARATION & TREATMENT PRODUCTS

Aluminium requires care and attention during manufacturing and post fabrication. Callington's range of Australian made aluminium care products covers all. From surfacing cleaning prior to welding and post fabrication care to extend and improve the surface appearance and life cycle Callington has the product for you.

ALBRIGHT

Albright is a powerful acidic detergent designed to quickly remove atmospheric corrosion, road grime and soils from all aluminium surfaces, various stone and cement building materials. Albright is often used to prepare an aluminium surface before welding and to clean off the weld scale.

Commonly it is used to deoxidise and brighten transport vans, boat hulls, aluminium sidings and road tankers.

Albright works quickly to restore the original lustre to the metal.

S-WELD BRITE WASH

S-Weld Brite Wash is an acidic, biodegradable detergent designed for surface cleaning for stainless steel & carbon steel after fabrication. It is also suitable for in-situ cleaning of architectural stainless steel surfaces.

S-Weld Brite Wash removes surface dust, soil, rust, water stains, iron and organic contamination without affecting the surface finish of the stainless steel. It can also be used to remove surface corrosion and staining on handrails and other stainless steel surfaces. It is excellent for cleaning of machined carbon steel parts.
